please forward to the Unit.

All,

In an effort to answer a FOIA request, I am requesting that all TICTU employees and contractors immediately do a word search of their e-mail system (active and archived records) for the term "DCS-3000" and "DCS 3000" and "DCS3000" (variations of the same term). If a document or e-mail is located print it and bring the hard copy to [redacted] for compilation.

I need this accomplished ASAP. If there is a negative response - I need that also.

Thanks

b2
b7E

I realized Friday night that there was an error in the numbers I provided you last week. Specifically, last week's number included target-days from the beginning of the intercept through [redacted]. If the intercept started before [redacted] and was active between [redacted] the target-days data will be statistically flawed. So, I have re-run the numbers with a hard-limit on the start and stop dates.

I have numbers for [redacted] that I believe are accurate. [redacted] Here are the results:

b2
b7E

b2
b7E

b2
b7E

Total Cost = ?

the costs were easily calculated using the following formula:

b2
b7E

It is impossible for me to accurately calculate the costs using the data from the DCS-3000 system since costs are a function of the number of switches provisioned with the target. Since the number of switches vary with each intercept order I cannot accurately calculate the cost.

Hello Gentlemen -

has been dragging their feet in getting back with us regarding the number of lines/targets we have with them. So I met with to discuss the contracting issue. Here's what we came up with and would welcome your input.

Since has been slow in responding, let's start with you indicated that you have a good relationship with them, (and they're starting to charge us) can you get an indication of coverage from them, regarding all of our stuff to include anything with the Bureau name on it (to include join coverage etc) and Then can you pull from what numbers you have with so we can compare the two.

What we're looking to do is get a snap shot of actual lines being used that we can verify. Then, what will do is add a rider in the contract that will allow for an increased amount/coverage. What she is concerned about in getting into a big and then not using the service (i.e. paying/contract for lines and only using

Since this will be an overt contract and other Law Enforcement Depts. & agencies, along with would be our customers and not the vendor's, we should be able to go through open government sales without issues (PLEASE correct me if I am wrong!!) So if either of you know a sales person/contact in either or can find out through your other channels/contacts, please let me and know. We would still like to have something in place for October 1st.

So, to sum up...I need you gentlemen help with the following action items:

b2
b7E

- [redacted] etc)
- Whatever you all can pull up and verify.*

(*I recognize it may not be an actual representation of all coverage due to the field offices not all using [redacted] etc, but we have to start somewhere. And [redacted] this may be the springboard you need to get the Finance Division to help promote [redacted]

- Name of contact in Government Sales & Marketing for [redacted]
- Name of contact in Government Sales & Marketing for [redacted]

This message is being sent on behalf of
Unit Chief.

You are receiving this message because you are a Sponsor, Project Manager, or IPT member of an ongoing or proposed Information Technology (IT) Investment. Please

forward this message, along with the attached DRAFT FY08 OMB Circular A-11, Section 300, to all persons involved in writing your Division's OMB Exhibits 300.

Last week the Office of Management and Budget (OMB) released a DRAFT of its Fiscal Year 2008 OMB Circular A-11, Section 300. It contains OMB's DRAFT instructions for completing the FY08 OMB Exhibit 300. While this is not the final/approved A-11 update for FY08, it will give you an idea of what OMB will be looking for this year.

According to DOJ, the next OMB update will be released the week of 29 May 06. DOJ expects this update to include the 99% solution for both the FY08 OMB Exhibit 300 as well as the FY08 OMB Circular A-11. As soon as we receive these materials we will send them on to you.

This message is being sent on behalf of [REDACTED]
Unit Chief.

You are receiving this message because you are a Sponsor, Project Manager, or IPT member of an ongoing or proposed Information Technology (IT) Investment. Please forward this message, along with the attached FY08 OMB 300 template, to all persons involved in writing your Division's OMB Exhibits 300.

This week the Office of Management and Budget (OMB) released a DRAFT of it's Fiscal Year 2008 OMB Exhibit 300 (business case) template. For FY08, OMB has dramatically changed both the content and structure of it's Exhibit 300.

The purpose of this message is to quickly provide you the new format so you can begin working on your FY08 OMB 300 submissions. They are due to [REDACTED] OIPP/IMU, 4-3171), using the attached template, by COB on Monday, 26 June 06.

b6

[redacted]
Please see the below email from [redacted] We have a FOIA request dated March 17, 2006 from EPIC (Electronic Privacy Information Center) which seeks access to all agency records concerning an electronic surveillance system known as DCS-3000. EPIC's request references a March 2006 report from the DOJ IG, which states that:

The FBI has spent nearly \$10 million on [DCS-3000]. The FBI developed the system as an interim solution to intercept personal communications services delivered via emerging digital technologies used by wireless carriers in advance of any CALEA solutions being deployed. Law enforcement continues to utilize this technology as carriers continue to introduce new features and services.

[redacted] recommendation is that anyone who has been associated with this project should begin to gather potentially responsive documents in anticipation of RMD's Search EC which will be coming to you in the not too distant future requesting that you conduct a search and produce all potentially responsive documents.

We don't know the details yet but we have left messages for [redacted] Stay tuned,

DCS 3000 is a wireless telephone collection/processing capability maintained by the Electronic Surveillance Technology Section (ESTS) of the Operational Technology Division (OTD) [aka the Engineering Research Facility--ERF]. The Section Chief is SSA Michael Clifford and the Assistant Section Chief is [redacted] both of whom I have copied on this email.

It is possible that STLU may have some records relative to DCS 3000, but they would, in all likelihood, be in the context of specific investigations. I have CC-ed OGC [redacted] who, next to me, deals most that Section may have something. I have CC [redacted]

b6
b7C

RIDS received a new FOIA request dated March 17, 2006 from EPIC (Electronic Privacy Information Center) which seeks access to all agency records concerning an electronic surveillance system known as DCS-3000. EPIC's request references a March 2006 report from the DOJ IG, which states that:

The FBI has spent nearly \$10 million on [DCS-3000]. The FBI developed the system as an interim solution to intercept personal communications services delivered via emerging digital technologies used by wireless carriers in advance of any CALEA solutions being deployed. Law enforcement continues to utilize this technology as carriers continue to introduce new features and services.

Does this ring a bell to you? Has STLU worked this issue, and is likely to have records? What other HQ Divisions-Sections-Units are likely to have records? Thanks in advance for any and all leads --

Subject: RE: New EPIC Request:

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

[REDACTED]

RIDS received a new FOIA request dated March 17, 2006 from EPIC (Electronic Privacy Information Center) which seeks access to all agency records concerning an electronic surveillance system known as DCS-3000. EPIC's request references a March 2006 report from the DOJ IG, which states that:

The FBI has spent nearly \$10 million on [DCS-3000]. The FBI developed the system as an interim solution to intercept personal communications services delivered via emerging digital technologies used by wireless carriers in advance of any CALEA solutions being deployed. Law enforcement continues to utilize this technology as carriers continue to introduce new features and services.

Does this ring a bell to you? Has STLU worked this issue, and is likely to have records? What other HQ Divisions-Sections-Units are likely to have records? Thanks in advance for any and all leads --

Could you please add this [REDACTED] input to what TICTU submitted yesterday for the IT Information Request. Thank you.

Please forward to

The cost of hardware, software, encryption equipment, maintenance and the development work for the interface to the trilogy network or other FBI IT infrastructure for the [REDACTED] is unsure at this time. The [REDACTED] is currently configured as a stand alone collection system and does not interface with any outside network. Best approximation would be [REDACTED] per year.

TICTU is providing the following information regarding your IT Information Request. Included in the chart below is the DCS-5000 input. [REDACTED] input (SBIT) is also included below in red. Please let us know if you need additional information. Thank you.

(1) The table below provides the estimated project costs to interface the DCS-5000 to Trilogy.

DCS-5000 Project IT Costs

b2
b7E

b2
b6
b7C
b7E

*Recurring cost

Amounts are based, in part, on numbers of networking equipment and costs provided by [redacted] for [redacted] systems in field offices and resident agencies.

(2) [redacted]
The cost of the hardware, software, and the development work for the interface to the Trilogy network or other FBI IT infrastructure for the DCS-3000 system is approximately [redacted]. The majority of this cost is for hardware (e.g. routers and other networking equipment). The DCSnet costs are approximately [redacted] if you include the IP service contract we have [redacted] can elaborate on this topic if needed.

To All,

Due to the move, please provide [redacted] with all submissions no later than 3pm today. [redacted] and I will gather the data to send it to the front office later this afternoon.

[redacted] the DCS-6000 does not connect to trilogy, operate remotely over an IT system, or prepares data to be sent over an IT system. But, how it relates to DCS-NET may be a different story. So as not to duplicate numbers, if there is an IT cost for the 6000 and DCS-NET, can you include that number (and notation) with your estimate? Thanks.

Subject: RE: IT Information Request - Needed by Friday 3/24

www.konrad-zuse.de

This is tied primarily to future requests for money, 300 exhibits and requisition in FY07 and forward. However, the cost of each system should be looked at so we can determine our investment and support needs that are truly IT. We would like to know the cost of the part of each system that is IT (that allows our collection systems to connect to trilogy, operate remotely over an IT system, prepares data to be sent over/to an IT system).

I know this is a little vague but we need an estimate with some basis behind it.

Thanks.

[redacted] has asked that we determine the cost of the IT portions of the OTD collection systems listed on the OCIO master list of systems, applications, databases, and networks. For the systems/projects listed below, please determine or estimate as best you can the cost of the hardware, software, and the development work for the interface to the Trilogy network or other FBI IT infrastructure. This will help us separate the funding of National Security Systems that are not truly IT from IT systems, databases, applications and networks. Please provide an estimate by Friday 3/24.

[redacted]
Yes [redacted] did install circuit. We will be moving in circa 4/15. We were initially set to move in during this week and next, but [redacted] cannot have our new stuff installed 'til 4/10. I talked to [redacted] last week and I will be submitting an RMS today for two new DCS-3000s, etc. In answer to your question I will need new routers. The old equipment was toss about during the move from [redacted] to storage in [redacted] and I have no faith in their usability. I would say ship those to our old office in [redacted] on or about 4/15. Any questions, give me a call [redacted]

Thanks for your help [redacted]

This is to make you aware of the Kidnapping matter brought to me by SA [redacted] yesterday afternoon. [redacted] had obtained addresses and the orientation of [redacted] cell towers and wanted to know if it was possible to plot the orientation on a map and see if triangulation of a common area was possible.

[redacted]
I contacted [redacted] immediately took the cell tower addresses provided to me by [redacted] and within a few minutes, had the [redacted] towers plotted and the neighboring towers plotted on the DCS-3000. By the orientation of the three different signals and towers, an area was plotted to be the most probable area the calls were made. Because the cell phone did not hit any of the neighboring towers, we were able to greatly narrow the area where the calls could have been made.

[redacted] was a happy camper with this information.

[redacted] should be commended for their prompt action.

[redacted]
I am pleased to report that TICTU recently assisted the [redacted] field divisions with FISA intercepts of two separate [redacted] telephony subscribers. Also, TICTU recently assisted the [redacted] office with a pen-register intercept of a [redacted] telephony subscriber.

TICTU designed and developed a new intercept and delivery capability for the DCS-3000 system to facilitate these intercepts. [redacted] delivers the [redacted] connection supported by TICTU. The new DCS-3000 features securely deliver the intercepted [redacted] in real-time to the appropriate field offices via the [redacted] where the established DCS-3000 clients route the information to the DCS-5000 systems for collection.

[redacted] current intercept implementation [redacted] data is accessed and delivered in compliance with the [redacted] specification. [redacted] information is accessed by a [redacted]

[redacted] intercept implementation is also based on the [redacted] specification. But, unlike [redacted] delivers the intercepted audio via the [redacted]

office expects to conduct more intercepts with

in the near future.

Subject: RE: AUSA Request for Expert Testimony

UNCLASSIFIED
NON-RECORD

Sirs,

After consultation with AUSA Ko, I have confirmed that in light of the below complications/issues he will not be calling any witnesses in any way connected to the Tech Program. So we can stand down. Sorry for all the controversy, upheaval, and/or confusion.

Just to clarify though, the AUSA was not, as the below email suggested, seeking "an expert witness from ITD-ERF to testify about the DCS-3000 network" and all it's features, bell and whistles, etc. That was not the intention. No testimony of such was going to be elicited. He was merely seeking a way to establish/substantiate a foundation in open court, through a lay witness if possible, that the FBI intercepted the proper cell phones pursuant to the court orders, so that the intercepted conversations could be authenticated in court as "accurate" and lawful.

Thanks for your time.

Gentlemen, We have received the recent e-mail response to [redacted] communications with ERF re the possibility of a subpoena being issued to ITD for a testimonial presentation re the trial of US V. [redacted] ITD seeks to avoid all testimonial possibility re DCS 3000 and this matter. Obviously, we have serious concerns and apparently so do ITD/TICTU and the Legal folks back there....The info contains phone numbers and names of the parties involved thus far ...After speaking with you AL I think we understand the issues on both sides ...Hopefully, this all will pass and [redacted] will be tried and convicted successfully without any further complications. Good Luck

[redacted] San Diego field office (858 [redacted]) has advised the following: AUSA Peter Ko, Southern District of California, 619-557-6618, is going to trial on bureau case 245D-SD-56228 (U.S. vs. [redacted]). This case was the subject of a T-III several years ago at which time data was obtained from [redacted] via the FBI's DCS-3000 network. This case goes to trial in about 2 weeks and the AUSA says the defense has not stipulated to the T-III. Therefore the AUSA has subpoenaed a witness from [redacted] and now wants to subpoena an expert witness from [redacted] to testify about the DCS-3000 network. This has been discussed with [redacted] and we believe that we probably do not testify about this type matter. The trial is set to begin [redacted]. We are seeking your advice or your direct contact with AUSA Ko. Tks.

[redacted] One of my engineers was in [redacted] recently, where he connected [redacted] switch. We believe that your request pertains to a desire to connect the [redacted] RA to the [redacted] office so that the [redacted] office can pull the pen data from [redacted] in order to upload it to the [redacted] program. A dedicated connection is always better and gets the pen data to the main office in "real time", but it is expensive. A dedicated connection can be accomplished in several ways and a T-1 is one option. Any option is expensive. I believe your division is probably asking if TICTU will connect [redacted] to our DCS-3000 network, by paying for the connection. Regrettably, TICTU only pays for that type connection when an FBI location connects to a service provider's switch where that switch services multiple FBI Divisions, which the switch in [redacted] does not. This means that if your Division wishes to have a dedicated circuit between [redacted] and the [redacted] office, then the [redacted] Division would have to pay for that circuit. TTA [redacted] request is reasonable and the decision of whether or not to have the circuit installed is a decision to be made in the [redacted] Division. TICTU has been working on a dial up connection for [redacted] Division whereby the data from [redacted] would get to the [redacted] office via a daily dump. Check with TTA [redacted] on the status of that. A dial up daily dump is probably the least expensive means of getting the data into the TA at the [redacted] office. I recommend that your Technical Advisor discuss the merits of paying for a more expensive circuit with the Supervisor of the squad with the case on which the pen is running. The decision to build, and pay for, a special circuit for this type matter should take into account the seriousness of the case involved, the target, etc., and is usually a joint decision made between the Case Agent, Supervisor and the TTA. Costs of a circuit of this type are typically paid from Division case funds. Hope this answer helps.

[redacted]
This is tied primarily to future requests for money, 300 exhibits and requisition in FY07 and forward. However, the cost of each system should be looked at so we can determine our investment and support needs that are truly IT. We would like to know the cost of the part of each system that is IT (that allows our collection systems to connect to trilogy, operate remotely over an IT system, prepares data to be sent over/to an IT system).

I know this is a little vague but we need an estimate with some basis behind it.

Thanks

[REDACTED]

There are several things going on that we probably need to coordinate. I sent an e-mail to [REDACTED] from TA on 1/17/06 and have had no response. We really need to have meeting with TA and start a dialouge on how the DCS 3000 information is utilized in TA. I had a 20 minute conversation with [REDACTED] this morning about such issues. It would be nice to have the TA people come down here and give us a demo of current capabilities for analysis of the [REDACTED] data and talk about [REDACTED]. Second, I spoke with [REDACTED] last week. The [REDACTED] circuit is in, he wants to know when we can come out and hook it up. Also, the old task force wants to do cell site mapping. So we are getting double teamed on this one. I suppose at least two members of the team need to go out and do this one. Third, we have [REDACTED] to the new building. Does [REDACTED] have a plan for how we will request the circuits to be identified by both the originating and terminating locations? I forwarded the circuits from [REDACTED] on the 10th. In [REDACTED] we have at least [REDACTED] also to cross connect. Let me know when you have had a chance to think about these. This morning was kind of crazy recovering things from the weekend.

Good Morning!

A few weeks ago I attended DCS 3000 conference sponsored by TICTU in Kansas City, Missouri. Part of the conference was dedicated to training on the Telecommunications Database (TMD). During several TAC meetings we received briefings and demonstrations of this system. I was a vocal critic, citing duplication of work, shortage of personnel for data entry and lack of field consultation on its' need. Views and criticism I expressed were not just mine but those of other field offices that we (TAC) represent. I was adamant that I would not use TMD because it was unnecessary!

Mr. Clifford, Please see below the e-mail received yesterday from SSA [redacted] attended the TICTU Kansas City conference recently and spoke with [redacted] and me afterwards, advising that he was quite impressed with the TMD presentations and training presented to the attendees. He also advised that his opinion of the TMD had been reversed by 180 degrees and that he would be forwarding an e-mail to AD Haynes expressing that viewpoint.

[redacted]
FYI - From what I have been hearing from the field, there seems to be a growing trend that some JTTFs are purchasing their own [redacted] with or without DCS-3000 connectivity, and are looking to the FBI for assistance in maintaining these systems. One would think that a maintenance contract would have been purchased at the same time, but with limited state and local monies, I tend to doubt that. I believe now would be a good time for TICTU to begin discussions among ourselves as to how ITD would want to respond to the field in the event TTAs are committed to assist in this kind of situation.

In an effort to answer a FOIA request, I am requesting that all TICTU employees and contractors immediately do a word search of their e-mail system (active and archived records) for the term "DCS-3000" and "DCS 3000" and "DCS3000" (variations of the same term). If a document or e-mail is located print it and bring the hard copy to [redacted] for compilation.

I need this accomplished ASAP. If there is a negative response - I need that also.

Overview/description of the CBT course is as follows:

The Telecommunications Intercept and Collection Technology Unit is pleased to announce the release of a computer-based training course entitled, "Switch Based Intercepts using DCS 3000." This training focuses on an FBI software application used to conduct CALEA based intercepts. The course is designed for Technically-Trained Agents and covers the installation, configuration and use of the DCS 3000 suite of applications. The instructional material is provided on a CD and the entire course is designed to be completed in approximately four (4) hours.

b2
b7E

Since this courseware is now mandatory for students wanting to take enhanced classroom training provided by [redacted] we definitely need to meet to make sure we are all on the same page regarding us expanding our training. Currently, I provide the CBT as requested. Also, I'm not sure of all the logistics involved with having the CBT transferred over to the Virtual Academy and need your guidance in that area.

Let me know when you are available to meet. I'm sending a CD of the course to you for review.

[redacted]

Can you please provide me the Course Description for your new CBT course. I will need to submit it to the Virtual Academy team as well as place it on our web-site. When you have a minute, can you call me to discuss how this course will be run and be registered for. I will need to know when each person takes it and the date that it was taken for input into our database. Since [redacted] has stated it will be a pre-requisite for the Switchbased Intercept Courses, I will need to keep detailed records of everyone who takes the CBT course for a pool of candidates to take the Switchbased Course. I don't know what the best way is to do this, therefore, if we can meet to discuss it or talk over the phone, that would be great.

If you can email me the course description as soon as possible, I can get it into the Virtual Academy so you are ready for your students to enroll for credit in BPMS.

classroom training, I will know who is eligible to attend. Have you given it yet???

Let me know when you can meet and I will be there.

TICTU has some newly developed training to make available to the field TTA's. We can provide a copy to you guys at TPDU for review and comment. The following is requested to be sent out to the field for notification:

The Telecommunications Intercept and Collection Technology Unit is pleased to announce the release of a computer-based training course entitled, "Switch Based Intercepts using DCS 3000." This training focuses on an FBI software application used to conduct CALEA based intercepts. The course is designed for Technically-Trained Agents and covers the installation, configuration and use of the DCS 3000 suite of applications. The instructional material is provided on a CD and the entire course is designed to be completed in approximately four (4) hours.

To take advantage of this new resource, please contact [redacted] at (703) [redacted] or via a Triology e-mail.

Thanks

TICTU Customer,

The TICTU has created a computer-based training course for TTAs and CMP technical staff. The course, entitled Switch-Based Intercepts using DCS 3000, provides background information on the technology used to conduct CALEA based intercepts as well as basic information on how to use the DCS 3000 suite of applications.

TICTU needs your help! TICTU needs to conduct a beta test and review before releasing the course to the entire CMP community. To this end, we ask you to help us evaluate the training. If you agree, we will mail you a CD with the training course and instructions. All we ask is you review the material and fill of the evaluation form. TICTU would like to release this training to the field as soon as possible. If you can, please submit your evaluation form by Friday, July 21, 2006.

If you are unavailable to review this course, please let us know. Questions concerning this course review can be directed to [REDACTED] at (703) [REDACTED]

Thank you for your help ensuring that we produce a quality training product.

Thanks,
[REDACTED]

Hi all:

I just want to express how much I enjoyed the DCS3000 SW-based Intercept training, and the pleasure it was meeting all of you.

The class was very informative, and will serve as a great reference for my daily job responsibilities. Hopefully, the knowledge will allow me to be more comfortable with extracting information from the logs, but I'm sure I'll still be calling for your expertise and assistance.

Thanks again for the excellent class, and the continuing support.

Good luck with the move to the new building!!

Best regards,

[REDACTED]

Please note that all our seats for this course will remain for those Bureau field personnel who are in the TTA Program in accordance with their duty assignment as a Technically Trained Agent.

At some point in the future, the instructors for this course may decide to run a class for contractors only, but that would be their decision, and TPDU would not be involved in that. If at some point they decide to do that, they will notify such attendees who have been chosen.

Thanks,

[redacted]

Overview/description of the CBT course is as follows:

The Telecommunications Intercept and Collection Technology Unit is pleased to announce the release of a computer-based training course entitled, "Switch Based Intercepts using DCS 3000." This training focuses on an FBI software application used to conduct CALEA based intercepts. The course is designed for Technically-Trained Agents and covers the installation, configuration and use of the DCS 3000 suite of applications. The instructional material is provided on a CD and the entire course is designed to be completed in approximately four (4) hours.

b2
b7E

Since this courseware is now mandatory for students wanting to take enhanced classroom training provided by [redacted] we definitely need to meet to make sure we are all on the same page regarding us expanding our training. Currently, I provide the CBT as requested. Also, I'm not sure of all the logistics involved with having the CBT transferred over to the Virtual Academy and need your guidance in that area.

Let me know when you are available to meet. I'm sending a CD of the course to you for review.

[redacted]

Can you please provide me the Course Description for your new CBT course. I will need to submit it to the Virtual Academy team as well as place it on our web-site. When you have a minute, can you call me to discuss how this course will be run and be registered for. I will need to know when each person takes it and the date that it was taken for input into our database. Since [redacted] has stated it will be a pre-requisite for the Switchbased Intercept Courses, I will need to keep detailed records of everyone who takes the CBT course for a pool of

b6
b7C

candidates to take the Switchbased Course. I don't know what the best way is to do this, therefore, if we can meet to discuss it or talk over the phone, that would be great.

If you can email me the course description as soon as possible, I can get it into the Virtual Academy so you are ready for your students to enroll for credit in BPMS.

Thanks,

[Redacted]

[Redacted]

After discussing this within the unit, we foresee putting on 2 to 3 Switchbased Intercept courses. Previously we have had class sizes of 18 to 20 students. We would like to utilize the Computer Based Training we have developed as a prerequisite to the class so we can use the face to face time here to discuss more advanced operational topics. In the past we have taught the course in the front ERF classroom. Due to renovations we will have to see if that is still possible. At this point I am estimating the class will have 3 full days of instruction. We could have Monday as a travel day, Tues.-Thurs. for class and Friday as the return travel day. This course focuses on CALEA based ELSUR, and participants could range from FBI TTAs and ETs to some of the DCSP in the field offices. A full class is always preferred. Since this class will have a lot of new course material I don't see that the first class could occur for several months. Please contact me for any additional information you need.

It looks like it's going to be Friday! Either 10am or 2:30pm would work best.

You've come to the [REDACTED] I'm on the 4th floor. Once on the 4th floor, you turn toward the windows from the elevator "lobby" area and go down the hall to the right. I'm in the section of cubicles right there (the last section before the wall). 703 [REDACTED]

I don't even know where to begin on all this — so it may be like the blind leading the blind!

- C

I can meet with you whenever you want to meet. I agree, that too many hands are in this pot and it is driving me crazy. I hear different things from all sorts a people here.

Basically, I just need to know every time you give this training to someone so that I can put it into our TTA database so that when it comes time to fill the classroom training, I will know who is eligible to attend. Have you given it yet???

Let me know when you can meet and I will be there.

Overview/description of the CBT course is as follows:

The Telecommunications Intercept and Collection Technology Unit is pleased to announce the release of a computer-based training course entitled, "Switch Based Intercepts using DCS 3000." This training focuses on an FBI software application used to conduct CALEA based intercepts. The course is designed for Tehnically-Trained Agents and covers the installation, configuration and use of the DCS 3000 suite of applications. The instructional material is provided on a CD and the entire course is designed to be completed in approximately four (4) hours.

Since this courseware is now mandatory for students wanting to take enhanced classroom training provided by [REDACTED] we definitely need to meet to make sure we are all on the same page regarding us expanding our training. Currently, I provide the CBT as requested. Also, I'm not sure of all the logistics involved with having the CBT transferred over to the Virtual Academy and need your guidance in that area.

Can you please provide me the Course Description for your new CBT course. I will need to submit it to the Virtual Academy team as well as place it on our web-site. When you have a minute, can you call me to discuss how this course will be run and be registered for. I will need to know when each person takes it and the date that it was taken for input into our database. Since [REDACTED] has stated it will be a pre-requisite for the Switchbased Intercept Courses, I will need to keep detailed records of everyone who takes the CBT course for a pool of candidates to take the Switchbased Course. I don't know what the best way is to do this, therefore, if we can meet to discuss it or talk over the phone, that would be great.

If you can email me the course description as soon as possible, I can get it into the Virtual Academy so you are ready for your students to enroll for credit in BPMS.

Thanks,

[REDACTED]

After discussing this within the unit, we foresee putting on 2 to 3 Switchbased Intercept courses. Previously we have had class sizes of 18 to 20 students. We would like to utilize the Computer Based Training we have developed

as a prerequisite to the class so we can use the face to face time here to discuss more advanced operational topics.

In the past we have taught the course in the front ERF classroom. Due to renovations we will have to see if that is still possible. At this point I am estimating the class will have 3 full days of instruction. We could have Monday as a travel day, Tues.-Thurs. for class and Friday as the return travel day. This course focuses on CALEA based ELSUR, and participants could range from FBI TTAs and ETs to some of the DCSP in the field offices. A full class is always preferred. Since this class will have a lot of new course material I don't see that the first class could occur for several months. Please contact me for any additional information you need.

For the 1-week classes provided to tech agents; TPDU handled student registration, etc. while the instruction and materials were provided by SBIT. The 1-week classes had 8-10 students each and were held the following months within the past 3 years:

January 2003
March 2003
July 2003
January 2004
July 2004
March 2005
July 2005

b2
b7E

The 2-week classes we offered to State & Locals were organized and supported by [redacted] (no help from TPDU). These classes had 8-10 students each and were held the following months within the past 3 years:

June 2003
August 2004

Let me know if you need more details.

How many classes did TICTU put on last year and this year (05, 06)? How many were for TTA's and OGA's? Are we supporting the ET program in the field for CMP initiatives? Have we, in the past, augmented TPDU's budget for this training initiative?

I am not inclined to send any "extra funding" to TPDU to help offset training initiatives that should be covered by their budget in either programmed technical training or programatic responses to budget cuts because of priorities recognized by the Division.

In previous discussion with [] actually augmenting TPDU's budget through a reallocation of our already dwindling budget does not allow the field to feel the tightening of our belts as our assets become leaner. I believe that if the training is important enough, TPDU's priorities should cover it. If the request from [] for money is a departure from TPDU's previous strategy, then perhaps we will consider helping to pay for training, but for right now, operational concerns and deployments outweigh formalized training that does not fall within our standard course of business.

TICTU Customer,

The TICTU has created a computer-based training course for TTAs and CMP technical staff. The course, entitled Switch-Based Intercepts using DCS 3000, provides background information on the technology used to conduct CALEA based intercepts as well as basic information on how to use the DCS 3000 suite of applications.

TICTU needs your help! TICTU needs to conduct a beta test and review before releasing the course to the entire CMP community. To this end, we ask you to help us evaluate the training. If you agree, we will mail you a CD with the training course and instructions. All we ask is you review the material and fill of the evaluation form. TICTU would like to release this training to the field as soon as possible. If you can, please submit your evaluation form by Friday, July 21, 2006.

If you are unavailable to review this course, please let us know. Questions concerning this course review can be directed to [REDACTED] at (703) [REDACTED]

Thank you for your help ensuring that we produce a quality training product.

Thanks,

[REDACTED]

Hello -

The TICTU has created a computer-based training course for new TTA's. The course is entitled, Switch-Based Intercepts using DCS 3000, and provides background information on the technology used to conduct CALEA based intercepts as well as the basic information on how to install and configure the DCS 3000 suite of applications.

You have been selected to review the course, as we would like to get feedback on the course before making it assessable to the whole TTA community. The CD is being mailed to your office and the entire course should take no further than four (4) hours to complete. Upon completion, fill out the evaluation form found in the training course. **The deadline to submit the evaluation form is Friday, July 14, 2006.**

If you are unavailable to review this course, please let us know. Question concerning this course review can be directed to [REDACTED] at (703) [REDACTED]

Thank you for your help ensuring that we produce a quality training product.

Best regards,

b6
